MBA GOLD CORP.

Notes to the Consolidated Financial Statements

For the Six Months Ended July 31, 2005

1. NATURE OF OPERATIONS

The Company has interests in mining assets at the exploration stage, the economic viability of which has not been assessed. The realization of the Company's investment in mineral properties is dependent upon various factors, including the existence of economically recoverable mineral reserves, the ability to obtain the necessary financing to complete the exploration and development of the properties, future profitable operations, or, alternatively, upon disposal of the investment on an advantageous basis.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles applicable to a going concern which assume that the Company will realize its assets and discharge its liabilities in the normal course of business. Realization values of assets may be substantially different from the carrying values as shown in these financial statements should the Company be unable to continue as a going concern.

2. SIGNIFICANT ACCOUNTING POLICIES

These consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles and include the following significant policies outlined below.

(a) Basis of presentation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary. All intercompany transactions and balances have been eliminated upon consolidation.

(b) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and disclosure of contingent assets and liabilities at the date of the financial statements and for the periods presented. Estimates are used for, but not limited to, accounting for doubtful accounts, income taxes, the carrying value of long-lived assets, and contingencies. Actual results may differ from those estimates.

(c) Cash committed for exploration

Cash committed for exploration consists of proceeds of flow-through shares which were used to fund the costs of drilling the initial well on the Dover Prospect (see also note 7 (c)).

(d) Mineral Properties

All costs related to the acquisition, exploration and development of mineral and resource properties are capitalized. Upon commencement of commercial production, the related accumulated costs are amortized against future income of the project using the unit of production method over estimated recoverable mineral reserves. Management periodically assesses carrying values of non-producing properties and if management determines that the carrying values cannot be recovered or the carrying values are related to properties that are allowed to lapse, the unrecoverable amounts are expensed.

The recoverability of the carried amounts of mineral properties is dependent on the existence of economically recoverable ore reserves and the ability to obtain the necessary financing to complete the development of such ore reserves and the success of future operations. The Company has not yet determined whether any of its mineral properties contains economically recoverable reserves. Amounts capitalized as mineral properties represent costs incurred to date, less write-downs and recoveries, and does not necessarily reflect present or future values.

MBA GOLD CORP.
Notes to the Consolidated Financial Statements
For the Six Months Ended July 31, 2005

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Oil and gas properties

The Company follows the full-cost method of accounting for oil and gas properties whereby all costs relating to the acquisition, exploration and development activities are capitalized. These costs include land acquisition costs, geological and geophysical expenses, the cost of drilling both productive and non-productive wells and directly related overhead. Proceeds from the disposal of properties are deducted from the full cost pool without recognition of a gain or loss unless such a sale would significantly alter the rate of depletion and depreciation. Upon commercial production, the related accumulated costs are amortized against future income using the unit-of-production method based on production volumes before royalties in relation to total estimated proved reserves as determined by independent engineers.

(f) Property and equipment

Computer, furniture and equipment are recorded at cost and are amortized using the declining balance method at 30% per annum. Leasehold improvements are amortized on a straight-line basis over five years. Property and equipment are amortized at one half the amortization rate, in year of acquisition.

(g) Income taxes

The Company follows the asset and liability method of accounting for income taxes. Future income tax assets and liabilities are determined based on temporary differences between the accounting and tax bases of existing assets and liabilities, and are measured using the tax rates expected to apply when these differences reverse. A valuation allowance is recorded against any future tax asset if it is more likely than not that the asset will not be realized.

(h) Stock-based compensation

The Company recognizes stock-based compensation expense in accordance with CICA Handbook Section 3870 "Stock-based Compensation and Other Stock-based Payments". When stock or stock options are issued to non-employees, compensation expense is recognized based on the fair value of the stock or stock options issued. In February, 2004, the Company changed its accounting policy related to employee stock options, and began to recognize compensation expense for stock or stock option grants to employees, based on the fair value of the stock or stock options issued. See Note 3.

(i) Share issue costs

Direct costs relating to the issuance of shares are charged directly to share capital.

(j) Flow-through Shares

The Company has adopted EIC-146, which is effective for all flow-through share transactions initiated after March 19, 2004. Canadian tax legislation permits a company to issue securities referred to as flow-through shares whereby the investor may claim the tax deductions arising from the related resource expenditures. When resource expenditures are renounced to the investors and the Company has reasonable assurance that the expenditures will be completed, a future income tax liability is recognized and the shareholders' equity is reduced.

If the Company has sufficient unused tax loss carryforwards to offset all or part of this future income tax liability and no future income tax assets have been previously recognized for these carryforwards, a portion of such unrecognized losses is recorded as income up to the amount of the future income tax liability that was previously recognized on the renounced expenditures.

MBA GOLD CORP.
Notes to the Consolidated Financial Statements
For the Six Months Ended July 31, 2005

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(k) Foreign exchange

The accounts of the Company are expressed in Canadian dollars. Foreign currency monetary assets and liabilities are translated into Canadian dollars at the exchange rate in effect at the balance sheet date. Other balance sheet items were translated into Canadian dollars at the exchange rate in effect on the respective transaction dates. Translation gains and losses relating to monetary items are included in operations.

(l) Income (loss) per share

Income (loss) per share is calculated using the weighted-average number of common shares outstanding during the year. The treasury stock method is used in the calculation of diluted earnings per share. Diluted earnings per share are computed using the weighted-average number of common and common equivalent shares outstanding during the year. Common equivalent shares consist of the incremental common shares exercisable upon the exercise of stock options and are excluded from the computation if their effect is anti-dilutive.

(m) Comparative figures

Comparative figures have been reclassified, where applicable, to conform to the current period's presentation.

3. CHANGE IN ACCOUNTING POLICY

In February, 2004 the Company adopted the provisions of CICA Handbook Section 3870, "Stock-based Compensation and Other Stock Based Payments", as it relates to employee stock options. In accordance with the provisions of this section, the Company has accounted prospectively for all employee stock options granted, settled, or modified since February 1, 2004 as a charge to operations based upon the fair value method. The fair value method requires the Company to expense the fair value, as determined using the Black Scholes option-pricing model, of the employee options granted or modified during a period. Accordingly, the Company has recorded an amount in respect of employee options granted in 2005. Pro forma loss would continue to be disclosed as it relates to employee stock options granted during 2005.

4. MINERAL PROPERTIES

Worldbeater Gold Project

The Company has acquired an option from Compass Minerals NL, NSW, Australia ("Compass") to acquire up to a 60% interest in the Worldbeater Gold Project. The Worldbeater Gold Project is located in the Panamint Ranges, near Ballarat, Inyo County, California. The Company has earned a 30% interest in the project by carrying out an exploration program of U.S. \$500,000. A further 30% interest can be earned by completing a pre-feasibility study on the property on or before September 30, 2004 provided that this date can be extended if additional exploration is warranted. The Company elected not to complete the pre-feasibility study by September 30, 2004 and is currently reviewing various options. Compass will retain the remaining 40% interest as a joint venture partner if Compass elects to contribute to the cost of a bankable feasibility study, otherwise Compass's interest will be converted to a 20% interest and the Company will acquire the remaining 20% interest.

The Company has agreed to make annual land rental payments of U.S. \$20,000. and has agreed to issue 200,000 shares to Compass upon completion of the pre-feasibility study and a further 200,000 shares upon commencement of commercial production. As a condition to enter into the agreement with Compass, the Company posted a letter of credit in the amount of U.S. \$90,000 (Cdn \$110,331) for which a short-term investment in the same amount is held as collateral.

MBA GOLD CORP.
Notes to the Consolidated Financial Statements
For the Six Months Ended July 31, 2005

4. MINERAL PROPERTIES (continued)

Worldbeater Gold Project (continued)

The Company has written down its investment in the World Beater property to \$0 and did not make a US\$20,000 payment due June 30, 2005. Although discussions are continuing with respect to maintaining the Company's interest in the property, it is likely that the interest will be relinquished.

S310 Gold Property

The Company, through its wholly-owned subsidiary Manele Bay Goldfields Inc. ("MBG"), has acquired an option to acquire a 100% interest in a group of 12 unpatented mining claims in Humboldt County, Nevada. The Company made an initial payment of \$10,000 and issued 75,000 common shares related to this project. In order to maintain the option in good standing the Company must pay a further US\$7,500 and issue an additional 50,000 shares over each of the next three years and incur exploration expenditures of US\$400,000 by July 31, 2007. The Company can acquire a 100% interest in the property by paying US\$100,000 and issuing an additional 100,000 shares by January 31, 2008. The vendor will retain a 3% net smelter return royalty, 1.5% of which can be bought out for US\$1.5 million within 24 months of the commencement of commercial production. MBG subsequently acquired a 100% interest in an additional 12 contiguous mining claims through staking. Prior to the issuance of this report MBG negotiated an amendment to the option agreement whereby the exploration expenditure requirements have been extended for one year.

Cumulative exploration and acquisitions costs are as follows:

5. OIL AND GAS PROPERTIES

Dover and Gautreau Oil and Gas Project

On August 18, 2004 the Company entered into an oil and gas farm-in agreement with Contact Exploration Inc. (TSX-V: CEX) of Calgary, Alberta whereby the Issuer has the right to earn a 50% working interest in the Dover and Gautreau oil and gas prospects in Eastern New Brunswick by incurring 100% of the costs of drilling and completing an initial exploration well on each prospect.

Balance - July 31, 2005	18,721,498	\$11,155,592	(6,826)	\$ (40,928)

(c) Private Placement

On December 20, 2004 the Company completed a private placement of 5,000,000 units at \$0.20 per unit. Each unit consists of one common share and one common share purchase warrant. Each warrant will entitle the purchaser to acquire one common share at price of \$0.25 per share expiring December 16, 2005. 3,887,500 common shares were flow-through shares and 1,112,500 common shares were non flow-through shares. Proceeds were used to fund the costs of drilling the initial well on the Dover Prospect.

(d) Stock-based compensation plans

The Company has established a Share Option Plan (the “option plan”) which provides for options to purchase common shares to be granted by the Company to directors, officers, employees and consultants of the Company. At the date options are granted, the exercise price for an option shall not be less than the fair value of common shares of the Company. Options vest over a period of 18 months.

MBA GOLD CORP.

Notes to the Consolidated Financial Statements

For the Six Months Ended July 31, 2005

Pursuant to a private placement completed in December 2004, the Company issued warrants to purchase 5,000,000 common shares at a price of \$0.25 per share. The warrants associated with this private placement expire December 16, 2005. As of July 31, 2005, 200,000 warrants have been exercised.

Pursuant to a private placement completed in May 2002, the Company issued warrants to purchase 2,400,000 common shares at a price of \$0.105 per share until May 22, 2004. As of July 31, 2005, all warrants have been exercised.

In connection with a short form offering the Company issued 1,750,000 warrants to purchase 1,750,000 common shares at a price of \$0.50 per share on or before June 24, 2004. In accordance with this offering agreement all outstanding warrants were cancelled effective June 24, 2004.

8. RELATED PARTY TRANSACTIONS

Related party transactions not otherwise disclosed include the following:

	July 31 2005	July 31 2004
Consulting fees paid to directors	<u>\$ 10,000</u>	<u>\$ 15,000</u>

Related party debt of \$120,000 owing to two directors is unsecured, due on demand and non-interest bearing.
