

MBA GOLD CORP.
THREE MONTHS ENDED JULY 31, 2005
MANAGEMENT DISCUSSION AND ANALYSIS

1. Report Date and Description of Business

The following Management's Discussion and Analysis ("MD&A") is prepared as of September 29, 2005 and should be read in conjunction with the unaudited financial statements for the six months ended July 31, 2005. These documents can be found on the Company's website or at www.sedar.com. All dollar figures stated herein are expressed in Canadian dollars.

MBA Gold Corp. (the "Company" or "MBA") is a natural resource exploration company with interests in precious metals, oil and natural gas properties. Precious metals exploration is carried out through Manele Bay Goldfields Inc., a wholly-owned, Nevada based subsidiary. Oil and gas exploration is carried out through Canadian subsidiary MBA Energy Corp. At the Company's Annual General Meeting held in July 2005, the shareholders approved a change of the parent company's name to "MBA Resources Corp." in order to better reflect the diversified nature of the Company's operations. The name change is expected to be implemented in the third quarter.

2. Overall Performance

During the first quarter of this fiscal year the Company drilled and tested an initial well on the Dover – Gautreau oil and gas prospect as discussed below, called the Contact-MBA Gautreau F-29-2328 well (the "Gautreau #1"). The well was cased to total depth and tested in 9 intervals totaling over 27 meters of potential pay. Completion operations included perforating the above intervals and running recorders to measure pressure build-ups. Sampling of oil and gas recoveries and flow testing were also carried out. The shallowest zone, located from 356 to 364 meters, encountered light 35 API oil. Results of the completion indicated that both oil and gas are present, but current rates of recovery without further stimulation do not appear to be economic at this time. At quarter end, MBA and the operator were reviewing the completion results to see if further stimulation of the upper oil zone is warranted.

By completing the Gautreau #1 the Company earned a 50% working interest in the well and a surrounding 3 section parcel of land. The Company also holds certain rights to participate in further exploration within an adjacent area of interest covering approximately 50,000 acres. The Company is currently in discussions with the operator of the lands regarding potential exploration programs for the balance of 2005.

3. Results of Operations

The Company incurred a \$51,811 loss in the current quarter as compared to a \$100,718 loss in the corresponding period of the prior year. The decrease in the Company's loss as compared to the prior period was a direct result of lower Investor relation costs and Project investigation fees. Investor relation costs decreased because the investor relation position within the company was eliminated and absorbed by other personnel within the Company. Project investigation costs decreased to zero during the period as the Company focused its efforts on its Oil and Gas properties on the east coast.

Resource Properties

Dover and Gautreau Oil and Gas Project

On August 18, 2004 the Company entered into an oil and gas farm in agreement with Contact Exploration Inc. (TSX-V: CEX) of Calgary, Alberta whereby MBA can earn a 50% working interest in the Gautreau and Dover oil and gas prospects in Eastern New Brunswick by incurring 100% of the costs of drilling and completing the well on the prospect. Proceeds from the private placement on December 6, 2004 were used to fund the costs of drilling the Gautreau well.

The Company acquired a 50% working interest in the 2550 acre Dover Prospect by drilling, testing and completing an initial test well during the period January through May 2005. Results of the completion indicated that both oil and gas are present, but initial rates of recovery did not appear to be economic without further stimulation.

S310 Gold Property

On September 29, 2004 the Company, through its wholly owned subsidiary Manele Bay Goldfields Inc. ("MBG"), optioned a 100% interest in a group of 12 unpatented lode mining claims (the "S310 Property") adjacent to the Sleeper Gold Mine in Humboldt County, Nevada. The S310 Property option was acquired in consideration of an initial payment of US\$10,000 and the issuance of 75,000 common shares of MBA. In order to maintain the option in good standing, MBA must pay a further \$7,500 and issue an additional 50,000 shares over each of the next 3 years and incur exploration expenditures of an aggregate of \$400,000 by July

MBA GOLD CORP.
THREE MONTHS ENDED JULY 31, 2005
MANAGEMENT DISCUSSION AND ANALYSIS

31, 2007. The Company's interest will be subject to a 3% net smelter return royalty, 1.5% of which can be bought out for \$1.5 million. Subsequent to the end of the quarter, MBG negotiated an amendment to the option agreement whereby the exploration expenditure requirements have been extended for one year.

World Beater Project

On November 5, 2002 the Company entered into an agreement with Compass Minerals Ltd., ("Compass"), whereby the Company has the option to acquire up to a 60% interest in the World Beater Gold Project. During the 2004 fiscal year, the MBA earned its initial 30% interest by carrying out an exploration program of at least \$500,000 U.S. by December 2003. A further 30% interest can be earned by completing a pre-feasibility study on the property. If the Company proceeds with the pre-feasibility study and earns a further 30% interest in the project, Compass could retain the remaining 40% interest as a joint venture partner if it elects to contribute to the cost of a bankable feasibility study, otherwise Compass's interest will be converted to 20% carried interest and MBA will acquire the remaining 20% interest for a total 80% interest in the project.

The Company has elected to defer the decision to proceed with the pre-feasibility study and is assessing the properties potential for further exploration. The Company has written down its investment in the World Beater property to \$0, and did not make a US\$20,000 payment due June 30, 2005 which will likely result in the relinquishment of the Company's interest in the property.

Market Trend

Oil and natural gas prices have increased over 50% since the start of this year reaching all time highs. In addition gold prices have remained high over the past fiscal year ranging between approximately US\$410/oz and US\$450/oz.

4. Summary of Quarterly Results

The interim financial statements have been prepared in accordance with generally accepted accounting principles, and are expressed in Canadian dollars.

General Trends

During the course of the eight prior quarters MBA has seen an increase in its investment in Mineral Properties and Oil and Gas Properties. During the quarter ended July 31, 2003 the Company completed a short form offering raising gross proceeds of \$1,275,000. It was also during this quarter that the Company commenced the initial exploration on the World Beater gold project.

In the second quarter of fiscal 2005 the Company acquired an interest in its 2nd mineral exploration property, the S310 Property in Humboldt County Nevada. No exploration expenditures have been incurred on the S310 property to date.

In the third quarter of fiscal 2005, the Company through its wholly-owned subsidiary, MBA Energy Corporation acquired an interest in the Dover and Gautreau oil and gas projects and drilled an initial exploration well.

All of the foregoing are described in more detail under the heading "Resource Properties" above. The Company intends to expand its focus on resource exploration, with a short to medium term emphasis on oil and gas exploration.

6. Liquidity

Historically the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company has issued common share capital pursuant to private placement financings and exercise of warrants and options. The Company's access to exploration financing when the financing is not transaction specific is always uncertain. There can be no assurance of the continued access to significant equity financing.

At July 31, 2005, the Company had working capital of approximately \$8,968. As the Company chooses to proceed on its exploration program at the Dover and Gautreau oil and gas projects and its pursuit of other potential acquisitions, it will need to raise additional funds for such expenditures.

The Company has no long term debt, capital lease obligations, operating leases or any other long term obligations. The Company has no "Purchase Obligations" defined as any agreement to purchase goods or services that is enforceable and legally binding on the Company that specifies all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the proximate

MBA GOLD CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

timing of the transaction.

7. Capital Resources

The Company had no commitments for capital expenditures as of July 31, 2005

The Company has no lines of credit or other sources of financing which have been arranged at this time.

8. Transactions with Related Parties

Koele Capital Corp, of which the President and CEO is a shareholder was paid \$10,000 in consulting fees for the quarter. The Company has an ongoing contractual arrangement with Koele Capital Corp to continue monthly consulting fees at \$5,000/month, however, 50% of this amount is currently being deferred. At July 31, 2005 the Company has related party debt of \$120,000 owing to two directors of the Company. The debt is unsecured due on demand and non-interest bearing.

9. Proposed Transactions

The Company has no proposed asset or business acquisitions or dispositions, other than those in the ordinary course of business before the board of directors for consideration.

10. Changes in Accounting Policies including Initial Adoption

The Company has adopted the standard in CICA Section 3870, Stock-based Compensation and Other Stock-based Payments, for accounting for stock options, as disclosed in Note 7 (e) of its annual audited financial statements.

11. Other MD&A Requirements

Additional information relating to the Company, is available on Sedar at www.sedar.com.

12. Additional Disclosure for Venture Issuers Without Significant Revenue

- (a) Capitalized or expensed exploration and development costs;
 - Disclosure is presented in the Notes to the Financial Statements – Note 4 & 5
- (b) Expensed research and development costs
 - There were no expensed research and development costs during the period.
- (c) Deferred development costs;
 - Not applicable
- (d) General and administration expenses; and
 - Disclosure is presented in the Consolidated Statements of Loss and Deficit
- (e) Any material costs, whether capitalized, deferred or expensed, not referred to in (a) to (d);

12. Forward Looking Statements

This discussion includes certain statements that may be deemed "forward-looking statement". All statements in this discussion, other than statements of historical facts, that address future production, reserve potential, exploration drilling, exploitation activities and events or developments that the Company expects are forward-looking statements. Although the company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, continued availability of capital and financing and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements.
